DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17 and 20-21, drawn to a method of making a semiconductor, classified in class 438, subclass 435.
- II. Claims 18-19 are drawn to a semiconductor device, classified in class 257, subclass 123. The inventions are distinct, each from the other because of the following reasons:

Inventions Groups I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process (MPEP § 806.05(f)) namely without the steps of forming an insulation layer that covers the second upper layer and the sidewall spacers.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Alan Ryes in July 29, 2002 on (310) 556-7983 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2814

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven H. Rao whose telephone number is (703) 3065945. The examiner can normally be reached on 8.00 to 5.00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chaudhuri Olik can be reached on (703) 3062794.
